Save time and money with **zember web application**. It can intuitively keep you informed about your members' activities and subscriptions.

## Overview

**zember** is a web based Membership Management System designed to meet the requirements of all types of clubs. The intuitive interface makes it very easy to add members and edit their contact details.

## Simplicity

This web based solution allows non-technical users, as well as IT professionals, to modify and update members' information, create reports and a lot more at any time and from anywhere. Only a browser is required so as to log into the system through the **zportal** management console.

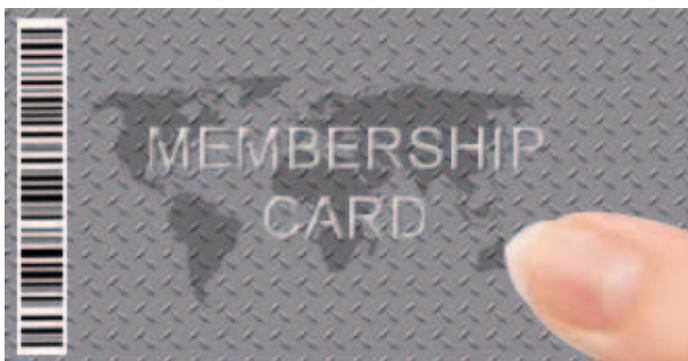

## Convenience

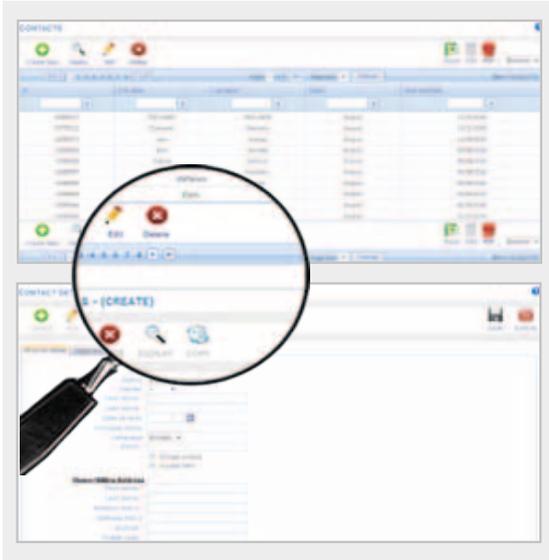

Navigation is performed very easily through a tree based menu. **zember** has the ability to print ID cards with barcodes and easily track members' access using a simple barcode scanner.

## Functionality

**zember** allows you to manage your members offering a centralized repository of valuable information about them. Get alerts about outstanding payments and schedule reminders to be sent out to your members.

zember

**Customize and integrate zremember with our other products and experience the flexibility of this application.**

## Security

zremember offers high security both at IP and users levels. More specifically, the application can perform a check of the source IP address of the user and if valid then the login page will appear. In order to log into the system, the users must enter the appropriate credentials and if correct access is granted.

## Management

Another important feature included in zremember, is related to users management. The system supports the creation of various user groups / roles which can be assigned certain permissions, controlling with this way the actions to be performed.

## Audit

When the user logs into the system, date and time are recorded, allowing the administrator to audit the various actions taken. Any actions taken related to adding or updating contacts or companies are recorded accordingly.

## Integration

zremember is fully managed through zeportal management console allowing integration with zecontent (content management system), zecommerce (electronic commerce system) and zecustomer (customer relationship management system) offering a multilingual support website where your users can view their activities and subscriptions, securely pay online, and get informed through marketing campaigns about your new products or services.
