Barracuda **Message Archiver**

Simple Yet Powerful Message Archiving for Efficiency and eDiscovery

Barracuda

Accessing and efficiently storing email are key needs of any organization, but are often quite challenging for IT. The Barracuda Message Archiver enhances user productivity and reduces cost and risk by simplifying user access, email management, and eDiscovery/compliance.

The Barracuda Advantage

- No per-user or per-server fees
- Mobile applications for anytime/anywhere access
- Outlook Add-in for folder-based searches and viewing
- Automated discovery and import of PSTs
- Attachment and whole message stubbing
- Cloud-based central management

Product Spotlight

- All-in-one, cloud-integrated message archiving appliance
- Enhances user mobile access and productivity
- Eliminates need for PST files
- Reduces email storage needs
- Extensive features to simplify eDiscovery/compliance

Enhance Mobile User Access

With full-featured, indexed access via iPhone, iPad, or Android devices to any email ever sent to or from a user, the Barracuda Message Archiver enables greater productivity by supplying better functionality and performance than many native mobile email applications. Users have fast access to all their messages, even deleted ones, to streamline their ability to perform.

### Simplify Email Management

Users treat mailboxes as filing cabinets, driving expensive server storage to expand continually. They respond to storage limits by archiving messages locally with PSTs, which are not managed (or even seen) by IT. The Barracuda Message Archiver dramatically reduces demand for email server storage through attachment stubbing, message/attachment deduplicaton, and compression, while also eliminating the need for PSTs.

Streamline eDiscovery and Compliance

The Barracuda Message Archiver's complete, indexed message archive supports extensive search, auditing/permissions, legal hold, and export. These features facilitate eDiscovery and support industry standards and retention plans to maintain compliance. An intuitive web interface and powerful feature set help shorten response time and ensure key messages can be located easily when needed.

Users can search and retrieve archived email anywhere, anytime.

Microsoft Outlook Add-in   Barracuda Message Archiver   Web Interface

Mobile Apps   Mail Server

Product Features

📁 Archiving
- SMTP messages, calendar, tasks, contacts
- Network crawling for PST import
- Reports: volume, storage utilization, violations, usage

👥 Access
- Full-featured, robust mobile apps (iOS, Android)
- Outlook add-in
- Web interface

Integration
- CIFS/iSCSI
- Exchange journaling
- Import from Exchange (MAPI)
- Import via IMAP and POP3
- Export via PST or EML
- Export to Copy (www.copy.com)

Management
- Predefined roles
- Granular control for access and policy
- Domain-level auditor
- Standard and custom policies
  - Foul language
  - Personal email use
  - Personally identifiable information
- Violation alert digests
- Retention policies
- Legal hold

🔍 Message Search
- Metadata, contents, attachments
- Compound, saved searches; results export
- Tagging

📈 Efficiency
- Exchange stubbing
- Deduplication
- Compression
- PST consolidation

🛡 Security
- Tamper-resistant storage
- Virus, spyware, and malware scanning
- Integration with LDAP directories
