

For comprehensive visibility into network and user activity - and protection from modern attacks—the Barracuda Firewall provides **a new generation of firewall capabilities, paired with cloud-based content security to minimize resource demands.**

- Security
- Storage
- Application Delivery

The Barracuda Advantage

- Integrated cloud-based content filtering
- Unlimited site-to-site and client-to-site VPN licensing
- Easy-to-use web-based administration
- Affordable, all-inclusive pricing
- Cloud-based centralized management

Product Spotlight

- Next-generation perimeter security
- Optimize multiple WAN links
- User visibility and application awareness
- Cloud-based content filtering, malware protection, and reporting
- High-Performance IDS/IPS
- Secure VPN with clients for Windows, Mac, and Linux

Next-Generation Capabilities

The Barracuda Firewall uses Layer 7 application visibility and user-identity awareness to enable enforcement of granular access policies. Define policies based on any combination of application, user or group ID, time, and other criteria. Policies can even respond to specific application behaviors or features—for example, allow all employees to use Skype voice, but allow only executives to use Skype video, except after business hours.

Leveraging Cloud Resources

By offloading processor-intensive content filtering and malware protection to the cloud, the Barracuda Firewall ensures that on-premises resources are fully available to deliver next-generation firewall capabilities without impacting throughput. And with effectively unlimited resources available in the cloud, scaling to meet growing needs is easy and transparent.

Affordable and Easy to Use

The Barracuda Firewall is the first firewall appliance to combine the power of next-generation capabilities with the elasticity of the cloud. Unmatched ease of use means there's no need for additional IT staff or special training. And with affordable, all-inclusive pricing, the Barracuda Firewall lets you budget with total confidence that there won't be surprise costs down the road.

Offload resource-intensive content filtering and reporting to the cloud.

In a crowded field dominated by the usual players, the Barracuda Firewall is a refreshing change. Building upon the strengths of NG, the simplicity of the Barracuda Web UI, and the ability to manage from anywhere with Barracuda Cloud Control, it is truly a product for the cloud generation.

Technical Specs

Firewall

- Stateful packet forwarding
- Intrusion Prevention (IPS)
- Application enforcement (including subtypes)
- DoS/DDoS denial of service protection
- NAT, PAT
- Object-oriented rule sets
- Dynamic rules/timer triggers
- User/group based firewall rules
- High Availability
- ARP security
- Bridging
- Virtual rule test environment
- Jumbo frame support

Infrastructure Services

- DHCP server
- HTTP proxy
- SIP proxy
- DNS cache
- SNMP support
- Authentication via captive portal
- Windows Active Directory agent for transparent user-IP mapping
- Authentication – supports NTLM, RADIUS, LDAP/LDAPS, Active Directory, local authentication

Traffic Optimization

- Uplink monitoring and aggregation
- Policy routing
- Traffic shaping and QoS
- 7 predefined shaping bands

VPN

- Unlimited site-to-site VPN licensing
- Unlimited client-to-site VPN licensing
- VPN certified (basic interoperability)
- SSL VPN
- Supports IPsec, PPTP
- Supports AES-128/256, 3DES, DES, null ciphers
- VPN clients available for Windows, Mac, Linux
- iOS and Android mobile device VPN support

Wi-Fi

- Wi-Fi (802.11n) access point on selected models
- Up to three independent wireless networks
- Click-through Wi-Fi portal web page for guest access

Support Options

Barracuda Energize Updates

- Firmware updates
- IPS signature updates
- Application control updates
- Standard technical support

Instant Replacement Service

- Replacement unit shipped next business day
- 24x7 technical support
- Hardware refresh every four years

Security Options

Barracuda Web Security

- Optional security subscription for 1, 3, or 5 years
- Includes web filter
- Includes malware protection
- Scanning in the cloud
