

Barracuda Web Filter

Unlock the Power of the Web

For today's connected business, constant interaction with online resources and applications is a simple necessity—despite the risks of lost productivity, wasted bandwidth, and data loss. The Barracuda Web Filter lets organizations **enjoy the benefits of web connectivity without the risks.**

- Security
- Data Protection
- Networking

The Barracuda Advantage

- Integrated and comprehensive solution
- Regulate Web 2.0 application activity
- Monitor and archive social-network messages (Barracuda Message Archiver required)
- Constant updates based on input from more than 150,000 collection points
- Block and remove malware
- No per-user or per-feature fees

Product Spotlight

- Predefined content-filtering categories
- Granular, user-aware policies
- Detailed, real-time visibility
- Integrated spyware and virus protection
- Unlimited remote filtering agents (models 410 and above)
- Server protection in virtual infrastructure

Constantly Evolving Capabilities

The Barracuda Web Filter is continually updated with the latest malware signatures, suspicious URL listings, and online application functionality. And as new requirements emerge—such as the need to monitor and regulate social-networking activities—upgrading with new capabilities is automatic, and always transparent.

Knowledge = Power

The Barracuda Web Filter's intuitive management interface delivers detailed, real-time visibility into network activity and web interactions. This lets administrators identify users and applications that waste bandwidth and harm productivity, and enforce granular policies to regulate access without impacting legitimate business uses.

Security Beyond Boundaries

Enforcing access policies on remote and mobile devices that are used off-network is critical for preventing malware intrusions into the network, and for preventing data loss. The Barracuda Web Filter includes unlimited licenses for agents and tools that ensure users and devices are protected whether they are on the network or at a public Wi-Fi hotspot.

Enforce web content and access policies for users both on and off the network.

The biggest challenge our company had was providing proper bandwidth to our 32 offices. The Barracuda Web Filter showed us that we did not need to add more bandwidth, just limit non-business-essential web surfing.

Security Features

- Content Filtering**
 - HTTP/HTTPS support
 - URL filtering by category
 - Image safe search
 - YouTube for Schools support
 - File type blocking
 - Anonymous proxy detection
 - SSL Inspection (on select models)

Application Control

- IM & P2P blocking
- Internet application blocking, including proxy applications (e.g., UltraSurf)
- IP and port blocking

Support Options

- Barracuda Energize Updates**
 - Standard technical support
 - Firmware and capability updates as required
 - Automatic virus & spyware definition updates
 - Automatic content filter database updates

Advanced Policy Creation

- Default guest and user policies
- User and group policy exceptions
- LDAP integration
- Single Sign-on user authentication
- Terminal server support
- Local users and groups
- Network IP address policies
- Time-of-day policies
- Custom categories
- Password bypass
- Bandwidth quotas

Social Media Control

- Web 2.0 application control
- Social media monitoring
- Suspicious keyword alerts

Instant Replacement Service

- Replacement unit shipped next business day
- 24x7 technical support
- Hardware refresh every four years

Network Threat Protection

- Spyware site blocking
- Spyware download blocking
- Dual-layer virus protection
- Detection of infection activity
- Spyware protocol blocking
- Barracuda Malware Removal Tool
 - Detect and remove malware from Windows computers

Remote Filtering

- Web Security Agent (Windows, Mac OS X)
- Barracuda Safe Browser (iOS-based devices)

Hardware Features

Connectors

- Standard VGA
- USB
- Ethernet (see chart below)

System Features

- Web-based interface
- Secure remote administration
- Web acceleration/caching
- VLAN support

Integrated Reporting Engine

- Graphical summaries
- Detailed user and group reports
- Bandwidth report
- Time/session reporting
- Report scheduling and exporting

Front Panel Indicators

- Power indicator
- Disk activity indicator
- Power button
- Reset button
