Fully Functional for 30 Days

SolarWinds Web Performance Monitor tracks response time for all of your websites and internal (behind the firewall), customer-facing, SaaS, and cloud-based applications. Incredibly easy to license, setup, and use, Web Performance Monitor offers the powerful, scalable features you need at a price you simply can't beat.

Web Performance Monitor at a Glance

- Continuously monitor your end-users' experience
- Monitor any Web application, whether internal (behind the firewall), external (customer-facing), SaaS, or cloud-based
- View a consolidated list of the status of all steps and applications
- Java™-based applications are fully supported to include rich Web technologies such as AJAX, Flash®, and Silverlight®

Features

Monitor Web Applications
Easily monitor internal (behind the firewall), customer-facing, SaaS, and cloud-based apps, and get an at-a-glance view into the status of all monitored applications using a slick Web-based dashboard.

Cloud-based Transaction Monitoring
Perform cloud-based transaction monitoring quickly, easily, and inexpensively, and run synthetic transactions from Amazon EC2 whenever and wherever you want.

Monitor Individual Steps
Keep track of each step as a separate event, and measure the latency of each discrete step in a complex recording to accelerate troubleshooting.

Multiple Player Locations
Simulate customers accessing your applications from all over the world, and check not only application health but also network availability.

Easy-to-Use Transaction Recorder
Quickly and easily record complex multi-step transactions with absolutely no tedious scripting involved.

Transaction Alerting/Notifications
Set warnings and custom timing thresholds for individual steps and entire transactions, and get automatically notified when a transaction fails, indicating an application failure.

Multi-tenant UI
Monitor Web applications and websites for global businesses and for IT shops that manage multiple business services and applications.

Simple Pricing Model
Simply multiply the number of recordings by the number of locations you want to monitor from, and that tells you the total number of licenses you need.

LUCID Interface
Simplify network troubleshooting with a Web interface that is Logical, Useable, Customizable, Interactive, and Drill-down (LUCID).

System Requirements

HARDWARE	MINIMUM REQUIREMENTS
CPU	Dual processor, 3GHz
Memory	3GB RAM
Hard Drive	20GB, free disk space is recommended
SOFTWARE	**MINIMUM REQUIREMENTS**
OS	Windows® 2003 & 2008 Server (32-bit or 64-bit) including R2, with IIS installed, running in 32-bit mode
.Net Framework	Version 4 or later
Database	SQL Server® 2005 SP1 Express, Standard, Enterprise SQL Server 2008 Express, Standard, or Enterprise, or SQL Server 2008 R2

NOTE: The minimum server requirements listed assume default configuration. Significantly increasing the poll rate or statistic collection rate could result in additional load on the server, which may require a larger CPU or additional memory.

About SolarWinds

Founded in 1999, SolarWinds delivers powerful and affordable IT management and monitoring software to over 100,000 customers worldwide – from Global 1000 enterprises to small businesses. Named by Forbes as one of the top 10 fastest growing technology companies, SolarWinds is improving the way IT management software is developed, priced, purchased, delivered, and used. Our IT monitoring and management software is built for SysAdmins and network engineers who need powerful, affordable, and easy-to-use solutions that save time and simply get the job done. Evaluating, buying, deploying, and using enterprise software shouldn't be complex. IT management solutions from SolarWinds are easy to try, buy, deploy and use. That's unexpected simplicity.
